PROFILE

international

Profile International was established in 1981 and has been manufacturing drinking straws in New Zealand for over 30 years.

Our 15,000 sq.ft factory and distribution centre is located in the South Auckland industrial park adjacent to Highbrook. Profile International is a 100% New Zealand owned, family run business. The straws we manufacture comply with the most stringent of certification requirements, ensuring confidence for small and large consumers around the country. These are sold under the PureSip brand. Our product range extends to a wide range of food and beverage related items under our Tastetoolz brand.

WE MANUFACTURE

Our South Auckland factory allows us to manufacture straw runs to suit your specific requirements. The PureSip range is hygienically certified to international food safety standards, HACCP standards.

Drinking straws can be made in a wide range of colours and sizes from 3.5mm to 10.0mm diameter.

An individual paper wrapping and wrapper branding service is also available.

WE SUPPLY

Our Tastetoolz range that we import and distribute includes a wide variety of affordable, disposable products ranging from plastic cutlery to toothpicks and more, complementary to the catering and food industry.

Our dedication to constant improvement means that our customers can access a wide range of quality food and beverage accessory products through our knowledgeable and friendly team.

PureSip®

For the best taste

SGS

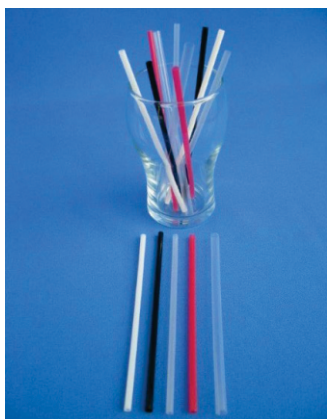

PureSip is owned by Profile Internaatinal, the only drinkingraw manufacturer in New Zealand. We are HACCP approved, ensuring you are buying the best products. We can manufacture runs of straws to suit your requirements (minimum order applies).

Manufacturing and Production Line Products

SGS

Profile International is able to offer manufactured items - Drinking straws, foldable spoons, forks and scoops and wooden skewers, sticks and stirrers. Our foldable utensils are hygienically wrapped in BOPP film. Our suppliers are able to manufacture items to your requirements and specifications. Most of these products can be branded with your company brand/logo if required.

The **P-Straw (Periscope Straw)** is a telescopic straw with the added uniqueness of a flexible corrugation section when the straw has been extended. It boasts a compact size when wrapped in film, and transforms to a long straw when extended, allowing a long straw to be incorporated onto a small pack size. Can be applied to a large variety of formulations, pack sizes and shapes. One straw size can be used on a variety of pack/cup/container sizes, thus reducing your packaging material stock holding. Can also be applied to cans with double sided adhesive.

The **T-Straw (Telescopic Straw)** is an extendable straw, with a compact size when wrapped in film, and transforms to a long straw when extended, allowing a long straw to be incorporated onto a small pack size. Can be applied to a large variety of formulations, pack sizes and shapes. Due to its practical novelty, one straw size can be used on a variety of pack/cup/container sizes, thus reducing your packaging material stock holding. Can also be applied to cans with double sided adhesive. T-Straws are a straight straw that extend out once removed from packaging.

Extendable U-Shaped Straws were invented to eliminate the size limitation of the I-straw and thus revolutionised the drinking straw market. U-Straws are more convenient to use and they have universal shelf appeal. We can supply correctly dimensioned U-Straws for all shapes and sizes of single portion liquid packaging. Several diameters are available for various liquid thicknesses. U-Straws have a pointed end and the straw can be straightened once removed from packaging.

The **Z-Straw** is the U-Straw but with two sets of corrugations. The Z-Straw is designed to eliminate the possibility of siphoning and help generate marketing opportunities that will results in higher sales.

These products are designed to be applied to drink containers. Straws come in a continuous plastic belt-form packaging, especially made for the manufacturing industry, compatible on high speed machines. Clear plastic packaging allows for branding to be printed on. These can also be made with an easy tear off tab for removal off the product item. These straws are also available in various diameters and lengths, and colours can be made to order.

Please enquire for minimum order quantities.

- Foldable Spoons
- Foldable Forks
- Foldable Spoon- Forks
- Ice cream scoops
- Gelato spoons
- Yoghurt Spoons

Foldable Spoons and Forks

Foldable Spoon Forks are particularly suitable for automatic application to various single portion containers such as tubs and cups for yoghurts, salads, desserts, etc.

Foldable Spoons are particularly suitable for automatic application to various single portion containers such as tubs and cups for yoghurts, salads, desserts, etc.

Our foldable utensils are hygienically wrapped in BOPP film and have an extendable handle for ease of use. The unique design of the foldable Spoon-Fork and Spoon facilitates convenient consumption anytime.

PROFILE

International

Manufacturing Plant.

We have the advantage of being a relatively small business, with the only drinking straw manufacturing facility in New Zealand.

This gives you, our customer, an advantage as we can produce short runs of product for any promotions you may have; provide colours that are not in our standard catalogue; or make straws in any size that you prefer. We can do all this with a short lead time to help meet your client needs and the changing market.

Manufacturing Products.

Straws

Profile International is in partnership with one of the world's biggest drinking straw manufacturers and are able to provide small wrapped straws to add to your own carton products.

Wooden Products

We are also able to offer machine grade sticks for your own production facilities. These straws and our wooden products can be tailored to suit your own production plant.

Commitment.

Our commitment to our customers is to offer the best service possible, ensuring you get high quality products at an affordable price, that are delivered correctly and on time.

Profile's point of difference is that we are committed to manufacturing in New Zealand and our production facility in East Tamaki is set up to meet this commitment.

We want to manufacture for New Zealanders, in New Zealand, by New Zealanders.

Hygiene.

Profile International has a high hygiene and manufacturing standard for the food industry- HACCP approved.

This rigorous annual audit ensures that all our customers using our PureSip brand products, know they are buying the very best. Our other branded products, Tastetoolz are HACCP approved.

***"At Profile International we are committed
to delivering great products at an affordable price."***
